

Protect your drivers and your fleet with video

We know you put in a lot of effort to train your drivers to be the best they can be. But you don't control the other road users. That's typically how incidents happen.

You need a way to protect and exonerate your drivers, reduce your fleet risk, and safeguard your business's reputation.

SmartDrive Protect features a forward and interior facing camera in a single unit, giving you great visibility both of the road in front and the driver. Within minutes of an incident, you'll know what happened.

It's affordable, with the basic tracking services you need at a reasonable price.

- Stand-alone video-based safety solution
- A proactive solution to preventing accidents
- Track location and movement of fleet
- Virtual ride along
- Video on demand
- Track incidents and KPIs

Easy to deploy and manage video safety

AI on the edge for in-cab coaching

Full HD video

GPS tracking encompassed in camera

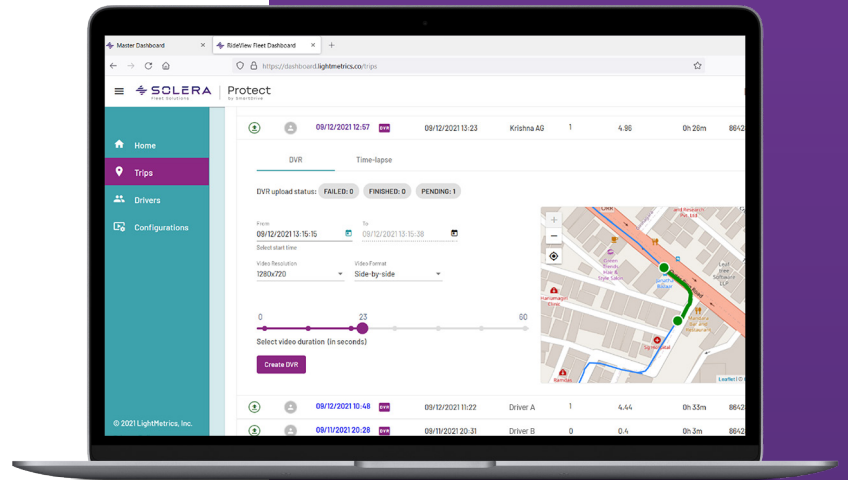

Simple installation – power, ground & stick
